NASHVILLE DISTRICT, CORPS OF ENGINEERS
3701 Bell Road
NASHVILLE, TENNESSEE 37214-2660

February 29, 2008

REPLY TO
ATTENTION OF:

Project Planning Branch

To Reviewing Agencies and Interested Parties:

The U.S. Army Corps of Engineers (Corps), Nashville District, advises that the Master Plan Update and Environmental Assessment for J. Percy Priest Reservoir, Davidson, Rutherford, Wilson, and Cannon Counties, Tennessee, is complete and a Finding of No Significant Impact was signed February 8, 2008.

The findings of the report conclude that the preferred action for full implementation of the proposed Master Plan Update would not constitute an action that would significantly affect the quality of the human environment within the meaning of the National Environmental Policy Act of 1969, as amended. Full implementation of the update would incorporate three actions: a) outdated information would be revised to reflect current status and classification of project facilities and lands, conditions, and usage, b) future uses and demands would be outlined, and c) corridors would be designated for existing and future outgrants of project lands.

If you have any questions or wish to obtain copies of the documents, please contact Kim Franklin, Biologist, at 615-369-7511 or visit the Corps website at www.lrn.usace.army.mil/pmgt/Environmental/public_notices.htm.

Sincerely,

A handwritten signature in black ink that reads "Patricia L. Coffey".

Patricia L. Coffey
Chief, Project Planning Branch
